SERVICES

The antiphishing services of **Hispacec Sistemas** make possible to reduce to a minimum the impact and probability that the clients of your portfolio might be attacked or cheated by organized crime networks specialized in online fraud.

These services allow to control in both a proactive and reactive way any fraud attempt that might affect your clients. These services are conceived mainly for banking entities and for e-commerce portals. These services include the implementation of a 24x7 customer service hot line for technical assistance for the surveillance of fraud incidents.

PHASES

24x7 Surveillance Service.

Monitoring of suspect domain names.

Communication with authorities and providers of the services involved in the attack.

Study of previous cases.

Obtaining origin data through audits.

Study of geographic factors of the phishing sources.

Analysis of platforms used in the attacks.

Comprehensive analysis of the attacker's profile.

Study of the effectiveness of possible countermeasures.

Optimized application of countermeasures.

Trend analysis based on our experience.

Tracking of official fraud prevention sources regarding phishing.

NEEDS

Your clients need to trust you.

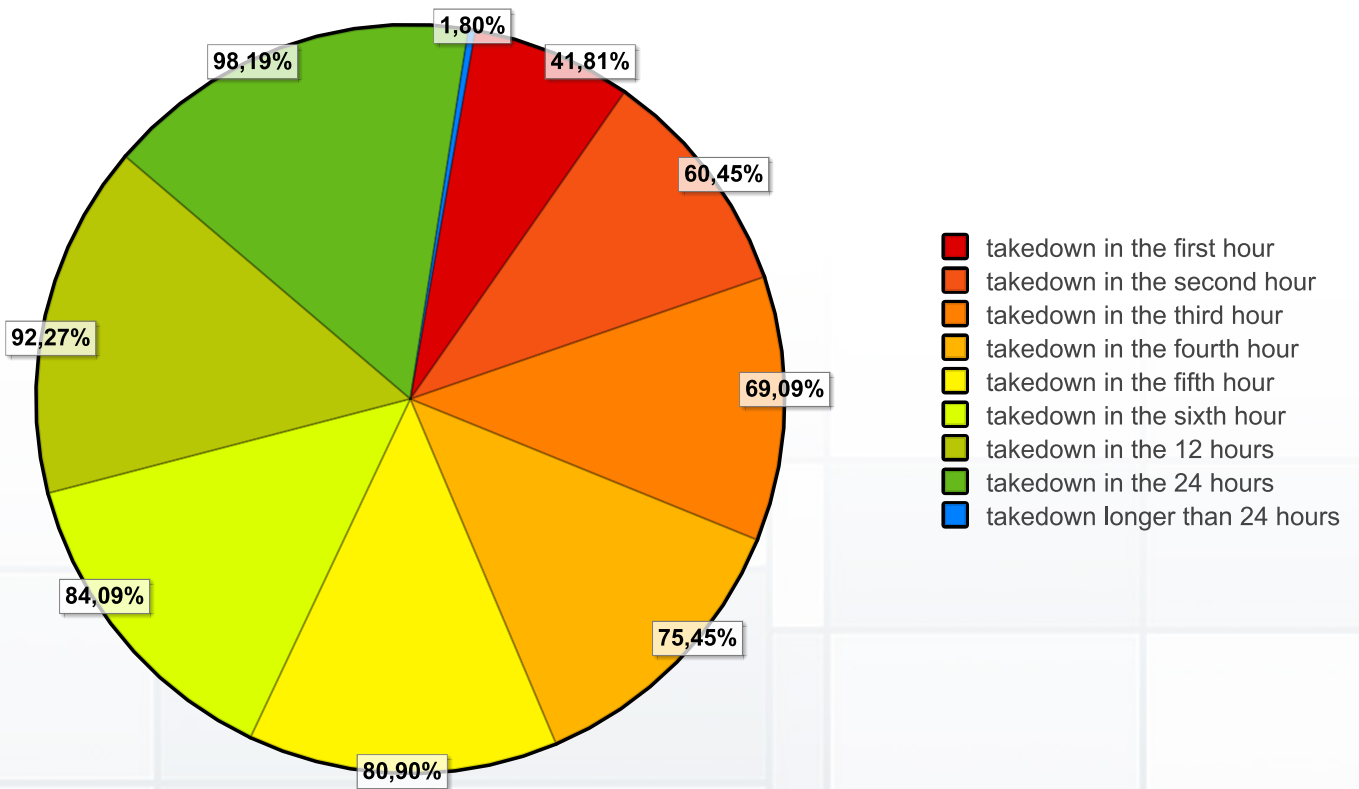

Frauds in general and especially phishing attacks are cause of mistrust of your clients. This lost of trust might imply image degradation of your company towards your clients and the potential customers of your services. We consider that it is the right time to undertake some measures.

STATISTICS

DAILY PHISHING THREATS (YEAR 2008)

HISPASEC'S PHISHING TAKEDOWN AVERAGE TIME (YEAR 2008)
